

COOLAIR COMPRESSORS

CoolAir delivers durable, precision-engineered machinery, piping, lubricants, and spare parts with full service backup—trusted for over a decade to ensure reliability, efficiency, and cost savings.

**CoolAir Compressors — 10
Years of Powering Industries**

Partner with us! Join our Co-Partner Program and grow with a brand that delivers.

Sarmak Compressors

Sarmak provides European-standard Rotary Screw & Piston Compressors for reliable, high-quality compressed air across diverse needs. [Read More...](#)

Dryers

Cool Air provides compressed air dryers that protect against moisture damage, ensuring clean, dry air for optimal system performance. [Read More...](#)

CoolAir Compressors

Cool Air provides reliable Rotary Screw & Piston Compressors for diverse applications, delivering optimal power, flow, pressure, and air quality. [Read More....](#)

Filters

Cool Air offers compressed air filters that protect against moisture and impurities, ensuring clean, reliable air for high-quality downstream processes. [Read More...](#)

Vacuum Pumps

Cool Air offers high-efficiency industrial vacuum pumps for reliable performance across diverse applications. [Read More....](#)

Automatic Drain Valve

Cool Air provides compressed air auto drain valves for efficient condensate removal, ensuring reliable, maintenance-free system performance. [Read More...](#)

Blowers

Cool Air provides industrial blowers designed for efficient airflow and reliable performance in demanding environments. [Read More....](#)

Air Receiver Tanks

Cool Air provides durable air receiver tanks for efficient compressed air storage and stable system performance. [Read More...](#)

Onsite Nitrogen Generation

Cool Air offers reliable, cost-effective nitrogen generators for medium to large-scale needs, ensuring a safe and continuous supply. [Read More....](#)

Air Leakage Detectors

CoolAir provides air and gas leakage detectors to identify leaks, save energy, cut costs, and boost efficiency. [Read More....](#)

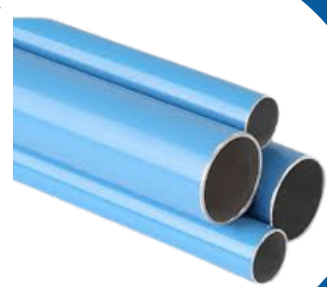

Onsite Oxygen Generation

Cool Air provides reliable, cost-effective oxygen generators for medium to large needs, ensuring a steady and efficient supply. [Read More....](#)

Flow Meters

Cool Air offers flow meters to monitor air consumption, detect inefficiencies, and reduce energy waste with precise, reliable measurement. [Read More...](#)

Aluminum Piping

Cool Air offers aluminum piping systems for air, vacuum, and gases with superior quality, 4X faster installation, and 4X lighter design. [Read More....](#)

Dew Point Meters

Cool Air provides dew point meters for accurate moisture monitoring, ensuring optimal air quality and preventing damage. [Read More...](#)

Stainless Steel Piping

Cool Air provides stainless steel piping systems for air, vacuum, and gases with high purity, corrosion resistance, and 4X faster, lighter installation. [Read More....](#)

Industrial Lubricants

Cool Air offers a full range of industrial lubricants and oils to ensure optimal equipment performance. [Read More...](#)

Spare Parts

Cool Air provides premium spare parts for all screw compressors, including filters, separators, and oil, ensuring reliable performance. [Read More....](#)

Services

CoolAir provides complete services from maintenance and installation to refurbishment, piping design, and leakage detection. [Read More.....](#)
